

Description

The PS50A non-isolated unregulated power supplies are designed to complement **ADVANCED Motion Controls**' high voltage servo drives. These power supplies contain a rectifier bridge and filter capacitors to generate the DC bus internally from the AC input power. These DC power supplies are an excellent solution for multi-axis applications since **ADVANCED** Motion Controls' servo drives compensate for power supply output variations and AC ripple components.

- ▲ Surface-Mount Technology
- ▲ Accepts Three Phase or Single Phase AC Supply
- ▲ Built-In Shunt Regulator with Bicolor LED Indicator
- ▲ External Shunt Resistor Provisions
- ▲ Compact Design

Power Ratings

| Model Number | AC Input Supply | DC Output Voltage | Output Current | Output Power |
|--------------|-----------------|-------------------|----------------|--------------|
| PS50A | 240 VAC | 340 VDC | 50 A | 17 kW |
| PS50A-LV | 120 VAC | 170 VDC | 50 A | 8.5 kW |

PS50A Series Power Supply

Operation

The DC bus voltage is 1.4 times AC voltage (RMS), e.g. 340 VDC from 240 VAC for the PS50A and 170 VDC from 120 VAC for the PS50A-LV. During braking much of the stored mechanical energy is fed back into the power supply and charges the bus capacitor to a higher voltage. If this voltage reaches the drive's over-voltage shutdown point, output current and braking will cease. To ensure smooth braking of large inertial loads, a built-in shunt regulator is provided.

The shunt regulator will switch on the internal power resistor when the bus voltage reaches the shunt switch-on voltage. This allows the bus capacitor to discharge and thus lower the bus voltage. During regeneration, the regeneration LED will blink (solid green is non-regeneration mode). An external shunt resistor can be added parallel to the internal resistor (between shunt terminals 1 and 2). Removing the jumper between shunt terminals 2 and 3 will disable the internal shunt resistor.

Agency Approvals

Compliant with European EMC Directive 2004/108/EC on Electromagnetic Compatibility (specifically EN 61000-6-4:2007 for Emissions, Class A and EN 61000-6-2:2005 for Immunity, Performance Criteria A). LVD requirements of Directive 2006/95/EC (specifically, EN 60204-1:2004, a Low Voltage Directive to protect users from electrical shock).

The RoHS II Directive 2011/65/EU restricts the use of certain substances including lead, mercury, cadmium, hexavalent chromium and halogenated flame retardants PBB and PBDE in electronic equipment.

SPECIFICATIONS

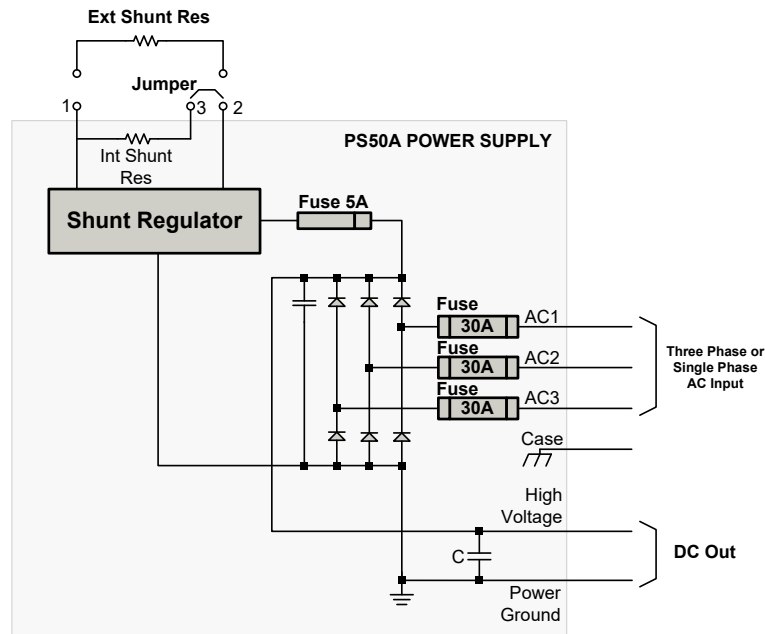

| Power Specifications | | | |
|--|-------|--------|----------|
| Description | Units | PS50A | PS50A-LV |
| AC Supply Voltage Input | VAC | 240 | 120 |
| AC Supply Input Frequency | Hz | 50-60 | |
| AC Supply Input Phases | - | 1 or 3 | |
| Continuous DC Current Output | A | 30 | |
| Peak DC Current Output ¹ | A | 50 | |
| Internal Shunt Resistor | Ω | 20 | |
| Internal Shunt Resistor Power Rating | W | 180 | |
| Shunt Regulator Switch-On Voltage | VDC | 390 | 190 |
| Bus Capacitance (@450V) | μF | 2310 | 7500 |
| Shunt Fuse (motor delay rated @500 VAC) | A | 5 | |
| AC Line Fuses (slow blow rated @250 VAC) | A | 30 | |

CUSTOMIZATION INFORMATION

ADVANCED Motion Controls’ products are available in many configurations. All models listed in the selection tables of the website are readily available, standard product offerings.

ADVANCED Motion Controls also has the capability to promptly develop and deliver specified products for OEMs with volume requests. Our Applications and Engineering Departments will work closely with your design team through all stages of development in order to provide the best servo drive solution for your system. Equipped with on-site manufacturing for quick-turn customs capabilities, ADVANCED Motion Controls utilizes our years of engineering and manufacturing expertise to decrease your costs and time-to-market while increasing system quality and reliability. Feel free to contact Applications Engineering for further information and details.

Examples of Customized Products

- | | |
|--------------------------------|-----------------------------------|
| ▲ Optimized Footprint | ▲ Tailored Project File |
| ▲ Private Label Software | ▲ Silkscreen Branding |
| ▲ OEM Specified Connectors | ▲ Optimized Base Plate |
| ▲ No Outer Case | ▲ Increased Current Limits |
| ▲ Increased Current Resolution | ▲ Increased Voltage Range |
| ▲ Increased Temperature Range | ▲ Conformal Coating |
| ▲ Custom Control Interface | ▲ Multi-Axis Configurations |
| ▲ Integrated System I/O | ▲ Reduced Profile Size and Weight |

Available Accessories

ADVANCED Motion Controls offers a variety of accessories designed to facilitate drive integration into a servo system. Visit www.a-m-c.com to see which accessories will assist with your application design and implementation.
