| Current Peak | **2 A** |
| Current Continuous | **1 A** |
| DC Supply Voltage | **10 – 55 VDC** |
| Network Communication | **RS485/232** |

The **FM060-1-RM** is a single-axis servo drive and integration board assembly for a FE060-1-RM FlexPro® series servo drive with IMPACT™ architecture. Connections to the controller, motor, power, and feedback are simplified through the standard connectors featured on the board.

The **FM060-1-RM** offers full tuning control of all servo loops and is designed to drive brushed and brushless servo motors, stepper motors, and AC induction motors. The drive accepts a variety of external command signals, or can use the built-in Motion Engine, an internal motion controller used with Sequencing and Indexing commands. Programmable digital and analog I/O are included to enhance interfacing with external controllers and devices.

The **FM060-1-RM** utilizes RS485/232 network communication and is configured via USB. All drive and motor parameters are stored in non-volatile memory.

IMPACT™ (**I**ntegrated **M**otion **P**latform **A**nd **C**ontrol **T**echnology) combines exceptional processing capability and high-current components to create powerful, compact, feature-loaded servo solutions. IMPACT™ is used in all FlexPro® drives and is available in custom products as well.

## FEATURES

- Standard Connections for Easy Setup
- Four Quadrant Regenerative Operation
- Programmable Gain Settings
- PIDF Velocity Loop
- Auto-Tuning Support
- On-the-Fly Mode Switching
- On-the-Fly Gain Set Switching
- Dedicated Safe Torque Off (STO) Inputs
- Bridge Status, Fault and Network Status LEDs
- I/O Status LEDs

## INFORMATION ON APPROVALS AND COMPLIANCES

| | |
|---|---|
| c UL us | US and Canadian safety compliance with UL/IEC 61800-5-1, the industrial standard for adjustable speed electrical power drive systems. UL registered under file number E140173. Note that machine components compliant with UL are considered UL registered as opposed to UL listed as would be the case for commercial products. |
| CE | Compliant with European EMC Directive 2014/30/EU on Electromagnetic Compatibility (specifically EN 61000-6-4:2007/A1:2011 for Emissions, Class A and EN 61000-6-2:2005 for Immunity, Performance Criteria A). LVD requirements of Directive 2014/35/EU (specifically, EN 60204-1:2019, a Low Voltage Directive to protect users from electrical shock). |
| RoHS Compliant | The RoHS Directive restricts the use of certain substances including lead, mercury, cadmium, hexavalent chromium and halogenated flame retardants PBB and PBDE in electronic equipment. |

| P5 POWER CONNECTOR | - | 2-port, 3.5mm spaced vertical entry screw terminal |
| P6 MOTOR POWER CONNECTOR | - | 3-port, 3.5mm spaced vertical entry screw terminal |

**Notes**

1. Capable of supplying drive rated peak current for 2 seconds with 5 second foldback to continuous value. Longer times are possible with lower current limits.
2. Continuous $A_{rms}$ value attainable when RMS Charge-Based Limiting is used.
3. Applications with a supply voltage higher than 30VDC require a minimum external decoupling capacitance of 470µF / 100V added across HV and POWER GND.
4. Lower inductance is acceptable for bus voltages well below maximum. Use external inductance to meet requirements.
5. Maximum motor speed for stepper motors is 600 RPM. Consult the hardware installation manual for 2-phase stepper wiring configuration.
6. Additional cooling and/or heatsink may be required to achieve rated performance.

## PIN FUNCTIONS

## BOARD CONFIGURATION

### Status LED Functions

| LED | Description |
|---|---|
| STAT | Indicates drive power bridge status. GREEN when DC bus power is applied and the drive is enabled. RED when the drive is in a fault state. |
| LOGIC PWR | Indicates that logic power is available to the drive. GREEN when logic power is available. |

### Switch Settings

The RS485/232 drive address and baud rate are set using DIP Switch SW1. Switch settings are given in the below table.

| SW1 | Description | On | Off |
|---|---|---|---|
| 1 | Bit 0 of binary RS485/232 address. | On = 1, Off = 0. Note that setting all addressing switches to 0 will use the address stored in NVM. Default setting is NVM address. | |
| 2 | Bit 1 of binary RS485/232 address. | | |
| 3 | Bit 2 of binary RS485/232 address. | | |
| 4 | RS485/RS232 Select | RS485 | RS232 (default) |
| 5 | Baud Rate | 115.2k | Set via software (default) |
| 6 | RS485 2-wire / 4-wire Select | 2-wire | 4-wire (default) |
| 7 | RS485 2-wire / 4-wire Select | | |
| 8 | Network Termination | Terminated | Not Terminated (default) |

### Safe Torque Off (STO) Inputs

The Safe Torque Off (STO) inputs are dedicated +5VDC sinking single-ended inputs. For applications not using STO functionality, disabling of the STO feature is required for proper drive operation. STO may be disabled by following the STO Disable wiring instructions as given in the hardware installation manual.

### Mating Connector Kit

Mating connector housing and crimp contacts can be ordered as a kit using *ADVANCED* Motion Controls' part number KC-MC1XFMCR01. This includes mating connector housing and crimp style contacts for the Communication, I/O and Logic, and Feedback connectors. The recommended tool for crimping the contacts is Molex PN: 63819-1500 (not included with the kit). Pre-crimped leads (Molex PN: 797581018) are also available for purchase from many inline component vendors.

*ADVANCED* Motion Controls also has the capability to promptly develop and deliver specified products for OEMs with volume requests. Our Applications and Engineering Departments will work closely with your design team through all stages of development in order to provide the best servo drive solution for your system. Equipped with on-site manufacturing for quick-turn customs capabilities, *ADVANCED* Motion Controls utilizes our years of engineering and manufacturing expertise to decrease your costs and time-to-market while increasing system quality and reliability.

### Examples of Customized Products

- Optimized Footprint
- Private Label Software
- OEM Specified Connectors
- No Outer Case
- Increased Current Resolution
- Increased Temperature Range
- Custom Control Interface
- Integrated System I/O
- Tailored Project File
- Silkscreen Branding
- Optimized Base Plate
- Increased Current Limits
- Increased Voltage Range
- Conformal Coating
- Multi-Axis Configurations
- Reduced Profile Size and Weight
