

# Servo Motion Solutions for Communications Control

**Making your job easier from  
concept → design → manufacturing → integration → production**

**Wide offering of servo drives, machine control, and embedded solutions**

Over 2.5 million servo  
axes shipped over  
25+ years

Off-the-shelf,  
modified, and  
custom hardware

## DigiFlex® Performance™

- Family of drives with full tuning control of Position, Velocity, and Torque
- Multiple network support - CANopen, EtherCAT®, Ethernet, RS485, Powerlink, Modbus

## M/V™ Series Motor Controllers

- Vehicle mounted motor controllers for modern mobile electric platforms
- Provides optimum performance in a watertight, ruggedized, IP65 case

## Extended Environment

- Configurable or Dedicated models
- Ambient operating temperatures from -40°C to +85°C
- Designed to assist compliance toward MIL-STD approvals
